

USE YOUR LAND FOR SOLAR NOT CROPS DOUBLE YOUR PROFIT

\$1,770- \$3,540 PER ACRE EACH MONTH*

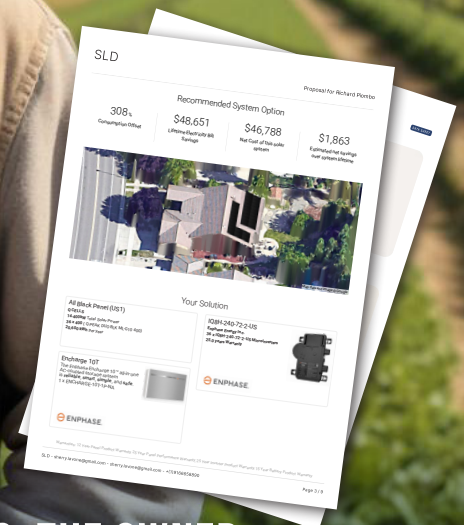

For many crop farmers, solar land leases may seem like a lucrative option with offers close to double the return per acre than what growing crops would produce. If you don't use a fair amount of electricity and don't have a federal tax liability to offset, this may be a viable option for you.

One acre of land with solar Factoring in various aspects, you can make about \$21,250- \$42,500 annually, translating to \$1770- \$3540 per acre each month. Therefore, you can estimate your total profits based on your farm size.
